## Pesticide Remover

The use of various types of pesticides and chemicals has become inevitable in the production and storage of food products. Many studies are available on the enormous health hazards these pesticides and chemicals cause to humans. These pesticides and chemicals are mostly applied to the surface of food items. Normal washing does not remove these pesticides or chemicals from vegetables and fruits.

Agripur Pesticide Remover, which received the IUFOST (International Union of Food Science and Technology) award in 2018, has been proven to remove and neutralize 99.99 percent of pesticides and chemicals on vegetables and fruits.

Agripur Pesticide Remover is now available in 1.5-gram sachets. Dissolve these in 2 litres of water and soak vegetables, fruits, fish, or meat in it for 20 minutes, then wash and use. Pesticides or chemicals, if present, can be seen as powders or streaks on the surface of the solution.

99% of systemic pesticides can be removed using Agrippur Pesticide Remover through various processes. Agripur Pesticide Remover is now being used by industrial producers in this way. Thus, they can effectively avoid rejection due to pesticides in exports.

As the world's population continues to grow, more food production will follow, and the henceforth the use of pesticides will increase in the future.

The only remedy to avoid the toxins that may enter the body through food products due to pesticides and chemicals and to avoid fatal / critical diseases is to neutralize these toxic chemicals applied to food products before consuming them.

Agripur Pesticide Remover is no longer a household requirement rather it is a necessity...

Let Agrippur Pesticide Remover be a friend in your life to avoid deadly diseases to a great extent...
